[Azure mobile app](#)

Microsoft Azure Marketplace interface showing search results for 'web app'.

Search Bar: web app

Filters: Pricing: All, Operating System: All, Publisher Type: All, Product Type: All, Publisher name: All

Results: Showing 1 to 20 of 770 results for 'web app'.

Results List:

- Web App** (Microsoft Azure Service)
 - Enjoy secure and flexible development, deployment, and scaling options for your web app
 - Create button (highlighted with a blue box and a checkmark)
- Web App + Database** (Microsoft Azure Service)
 - Enjoy secure and flexible development, deployment, and scaling options for your web app plus a database. Choice for optimizing your web application
 - Create button
- Damn Vulnerable Web App** (edgeNEXUS Virtual Machine)
 - DVWA is a vulnerable web application for studying security concepts and testing security tools
 - Starts at \$0.375/hour
 - Create button
- Static Web App** (Microsoft Azure Service)
 - Enjoy secure and flexible development, deployment, and scaling options for your web app
 - Create button
- Web App for Containers** (Microsoft Azure Service)
 - Bring your own containers and deploy them to App Service as a web app
 - Create button

Pricing plans
App Service plan pricing tier determines the location, features, cost and compute resources associated with your app. [Learn more](#)

Windows Plan (Central India) * (New) ASP-rgazuser3017mmllocalkA8tL-9b71

Pricing plan Standard S1 (100 total ACU, 1.75 GB memory, 1 vCPU)

Zone redundancy
An App Service plan can be deployed as a zone redundant service in the regions that support it. Your initial instance count will be set based on your zone redundancy configuration. To ensure you'll be able to enable zone redundancy at any point in the lifecycle of your app, enable zone redundancy now. You can decrease the instance count after the App Service plan is created. [Learn more](#)

Zone redundancy

- ☐ **Enabled:** Your App Service plan and the apps in it will be zone redundant. The minimum App Service plan instance count will be two.
- ☒ **Disabled:** Your App Service plan and the apps in it will not be zone redundant. The minimum App Service plan instance count will be one.

Hands-Ons

Deploying ASP.NET project into Azure Web App

The screenshot shows the Visual Studio interface with the 'WebApplication35: Publish' window open. The 'Publish' tab is selected in the left sidebar. The main area shows the deployment profile 'MyTestWebApp2404 - Web Deploy.pubxml' for 'Azure App Service (Windows)'. A 'Publish' button is visible. Below the profile, a progress bar indicates 'Publishing to Azure App Service (Windows)...' with a 'Cancel' button. The 'Settings' section on the right shows configuration details: Release, Target Framework (net8.0), Deployment Mode (Framework-dependent), and Target Runtime (Portable). The 'Output' window at the bottom shows the build and publish logs, including the command to build the application and the path to the output files.
